## GEEPLUS PRODUCTS MAKE THEIR DEBUT AT COMPAMED

In addition to launching their new website - [geeplus.com](http://geeplus.com) - which goes live to coincide with the start of the exhibition - Geeplus will be showing a number of new products, at Compamed (Stand 8A D14) many of which are being shown at an exhibition for the first time.

Our commitment to the medical industry is supported by our growing portfolio of leading edge electro-mechanical components which are already in use in life saving and support applications throughout the world.

These include peristaltic pumps in a range of sizes, new proportional rotary solenoids, brushless dc motors, testing equipment, voice coil motors and open frame push/pull solenoids which will be shown on the stand where visitors will be able to view a number of the components in action.
