

A CUSTOM BUILT STAND SHOWS NEW PRODUCTS BEING LAUNCHED AT COMPAMED

In addition to launching their new website - geeplus.com - which went live to coincide with the start of the exhibition - Geeplus are showing a number of new products, at Compamed (Stand 8A/D06) on their new stand which has been designed to provide customers with the opportunity to see even more new products.

Active displays and more display space reflect Geeplus' commitment to the medical industry and is supported by our growing portfolio of leading edge electro-mechanical components which are already in use in life saving and support applications throughout the world.

These include peristaltic pumps in a range of sizes, pinch valves, new proportional rotary solenoids, brushless dc motors, testing equipment, voice coil motors and open frame push/pull solenoids which will be shown on the stand where visitors will be able to view a number of the components in action.
