*January 2016*

## **GEEPLUS ADD DIRECT MOUNTED LEAD SCREWS TO THEIR STEPPING MOTORS**

For applications requiring longer drives or a different pitch, Geeplus are now supplying some of their stepping motor range with direct mounted lead screws.

Having adapted components for specific purposes in the past, especially in their rotary solenoid range, Geeplus is now offering the lead screw modification as a standard part on some of their stepping motor models. The lead screws are made to customer specifications with regard to size and pitch and fitted to the motors which will continue to provide the high levels of efficiency and reliability associated with Geeplus products.

Naturally, there will be some parameters whereby the practicality of the modification will not suit the application. In this instance, Geeplus engineers will offer alternative solutions
