

# PRESS RELEASE

## GEEPLUS EXHIBIT IN FINLAND - STAND 6m103

*October 2015* Geeplus exhibited in Finland this week at the Teknologia exhibition in Helsinki. We were represented on the stand of our Finnish distributor Densitron Nordic Oy (Stand 6m103), where they showed a wide range of Geeplus products including the latest long stroke solenoid and the VIBRO1 haptic actuator in addition to voice coil motors and a range of solenoids.

With almost 400 companies exhibiting this year Teknologia is one of the largest trade exhibitions in the Northern Baltic Sea Region and the previous event in 2013

attracted 12,500 qualified visitors. This year is likely to see a rise in figures as the organizers have combine several satellite exhibitions into a single event. The other shows included Automaatio, ELKOM, Hydraulics and Pneumatics, MecaTec, FinnTec, JoinTec and ToolTec.
